RoomService AI

24/7 Intelligent Call Coverage for Hotel Room Service

RoomService AI is built specifically for hotel room service operations. It ensures every call is answered, every order is accurate, and every guest interaction is handled consistently – without increasing staffing pressure.

THE OPERATIONAL PAIN

Four Critical Challenges Facing Room Service Operations

Missed Calls During Peak Hours

Breakfast rush. Late-night demand. Event spikes. When staff are handling deliveries or coordinating with the kitchen, calls ring out.

- Lost revenue
- Frustrated guests
- Negative reviews

Wrong Modifiers. Wrong Order.

Phone ordering breaks under pressure.

"No onions."

"Gluten-free."

"Sauce on the side."

"Medium rare."

If modifiers aren't captured clearly, the kitchen makes the default version.

- Remakes
- Delays
- Comped meals
- Guest dissatisfaction

Inconsistent Upselling

Upselling depends on who answers the phone and how busy they are.

- Missed add-ons
- Lower average order value
- Inconsistent revenue capture

Staff Overload

Front desk and F&B teams absorb overflow calls while managing in-person service.

- Slower operations
- Increased stress
- Reduced service quality

OUR SOLUTION

Consistent Service, Every Time

RoomService AI handles every call with the precision and consistency your operation demands

24/7 Instant Call Answering

Every room service call is answered immediately – no ringing out, no voicemail, no overflow.

Structured Order Confirmation

Before submission, the system confirms:

- Items and quantities
- Cooking preferences
- "No" ingredients and modifiers
- Allergy and dietary requirements
- Room number and delivery details
- Final confirmation from the guest

Orders are accurate before they reach the kitchen.

Built-In Revenue Optimization

Natural, structured upsell prompts are integrated into every order.

Direct Kitchen & POS Integration

Orders flow directly into existing systems – eliminating manual re-entry and miscommunication.

Peak-Hour Stability

High-volume periods are absorbed without impacting service levels or staffing.

ENTERPRISE TECHNOLOGY

Built for Luxury Hotels

Security & Compliance

- GDPR compliant data handling
- Isolated AI processing
- Regular security audits

Seamless Integration

- Works with your POS systems
- PMS friendly integration
- Existing menu sync
- Multi-language support

Room Service 24/7

Always Available. Always Premium.
